Looking forward to your participation.

Warm Regards

Rajiv K. Chug

Mr. Pethan to email to all teaching faculty & Pk students.
Thiruvananthapuram: 18/10/2021.

Topic: Things you cannot miss in today's dental practice.

Dentistry is changing the way it is practiced throughout the world and India is no exception. There are an array of laws, rules, and regulations for opening and running a dental clinic/hospital for practicing dentistry in our country. The 'Clinical Establishment Act' and various insurance providers/accreditation bodies focus heavily on maintaining quality by following standard operating procedures. With the ongoing COVID-19 pandemic, Infection Prevention and Control (IPC) practices are even more critical for patient and staff safety alike. It is imperative that an oral health professional should invest wisely in the proper selection of equipment and clinic designing.

The scheduled webinar is an attempt to make esteemed clinicians and practitioners aware of the rules and regulations required for practicing day-to-day dentistry and practical dental office designing.

Content will focus on:

1. Various rules for running a practice
2. Infection Prevention and Control in COVID scenario
3. Patient management
4. Patient and staff safety etc.
