LECTURE HALL 'A'

BHARATI VIDYAPEETH

(Deemed to be University)

DENTAL COLLEGE AND HOSPITAL, PUNE

Ozone therapy has a wide range of applications in almost every field of dentistry. Its unique properties include analgesic, immunostimulant, antihypnotic, detoxicating, antimicrobial, bioenergetic and biosynthetic actions. It is atraumatic, painless, non-invasive in nature. There is relative absence of discomfort which increases patient acceptability and compliance thus making it an ideal treatment choice for patients.

Regards
Organizing Committee
