## ULTRASOUND & TENS

**Therapeutic Ultrasound (Th US)** is a noninvasive therapeutic method which includes vibrations above 16,000 vibrations or 16 Hz in the management of myofascial pain. It is known to accelerate healing, decrease joint stiffness, alleviate pain, increase the extensibility of collagen fibers and reduce muscle spasm.

**Transcutaneous Electrical Nerve Stimulation (TENS or TNS)** is the use of electric current produced by a device to stimulate the nerves for therapeutic purposes. Its widely used in treating chronic facial pain, TMJ pain, myofascial pain dysfunction syndrome, trigeminal neuralgia, and post herpetic neuralgia, neuropathic pain and postoperative pain.
