NICOTINE REPLACEMENT
Nicotine replacement therapy (NRT) is a way
to help you quit smoking by reducing your
dependence on nicotine.
NRT products include patches, gum, lozenges,
inhalers, and nasal sprays.
NRT can help you quit smoking and
improve your health.
NRT is available over the counter at
pharmacies and health food stores.
NRT is also available by prescription from
your doctor.

Bharati Vidyapeeth Deemed University Dental College & Hospital

Department of Public Health Dentistry

Department of Public Health Dentistry organized a health education & treatment camp in the dept on 19th & 20th Dec. 2017 for children of PMC School Sutarwadi, Pashan.

A total of 47 children underwent treatment for Oral Prophylaxis, Pit & Fissure sealant and Topical fluoride application. The program was very well appreciated by the school authorities and the parents.

It was all possible due to the splendid efforts of the staff of PHD dept and posted interns.

Also heartfelt thanks to our Principal Dr. Kshirsagar Sir for his constant encouragement and motivation.

PIT AND FISSURE SEALANTS

DEFINITION
Pit and Fissure Sealants are thin plastic coatings placed on the occlusal surface of premolars and molars which help in preventing dental caries by sealing the tooth surface and oral environment.

PROCEDURE

1. Isolation of tooth surface
2. Cleaning
3. Etching
4. Rinsing and Drying
5. Application of Primer
6. Curing
7. Application and Sealing
8. Polish

ADVANTAGES

1. Non-invasive
2. Painless
3. Prevention of caries

CONTRAINDICATIONS

1. Lack of adequate space
2. Severe caries
3. Severe malocclusion

INDICATIONS

- Premolars
- Molars
