Dear sir / madam,

As per directives from Prof. Dr S F Patil sir, we are in process of creation of Google Scholar account for BVDU Pune. This will have three phases as mentioned below. You all requested to inform this activity to all faculty members of our esteemed university.

Individual staff members have to fill data in the link provided in the mail after creation and verification of Google Scholar account. You are requested to mail compiled data for institute/college/department in the attached excel file.

Bharati Vidyapeeth (Deemed to be University) Pune **Data for University Google Scholar Account**

-
Very Urgent

Phase I : Google Scholar Account for Faculty.

Most of the faculty members of BVDU Pune have already Google scholar account and associated profile. The faculty who don't have this account should be instructed to create and update with their publication.

Phase 1: Process to Create Google Scholar Account of individual faculty.

1. Create basic profile

Log on to <https://scholar.google.com> and click the "My Profile" link at the top of the page to get your account setup started.

2. On the first screen, add your affiliation information (Bharati Vidyapeeth (Deemed to be University) Pune and official email address @bharatividyaapeeth.edu), so Google Scholar can verify and confirm your account. Add keywords that are relevant to your research interests, so others can find you when browsing a subject area.

3. Click "Next," and – that's it! Your basic profile is done. Now add some publications to it. Google Scholar will provide you with groups of articles they believe belong to you. Select any group that is your work. If you don't see your articles in a group, click "Search articles" to do a search, and add your articles one at a time. Click the blue arrow at the top left of the page to move on to the next step. As mentioned above, there may be publications in the article groups that you do not want included on your profile. These may include newsletter

Email to all Teaching faculty.

Shubham 08/12/2020

items or articles that do not reflect your current research interest. They may also include articles from researchers other than yourself. You can manually delete those after you have created your account.

4. Make your profile public- Your profile is private if you've just created it. You can change your profile visibility by clicking the pencil icon next to your name and checking "Make my profile public" in the window that appears.

The link for collecting details from faculties.
