Overview of Topics

About the Programme

The 'Comprehensive Clinical Residency Programme' is an extensive 4 weeks programme conducted at 'Dr. APJ Abdul Kalam Education and Research Centre and Super speciality Dental Clinic', Mumbai which provides the ambitious dental professionals the foundation to develop their career and evolve clinical skills/dexterity for better patient care.

Our Indian Dental Association certification programme gives you ample opportunity to treat patients with the state of the art infrastructure and handle the most advanced materials and technology, enhancing individual's horizon for future developments and growth in field of dentistry.

Course Outline

1

Foundation Module:

Webinars and e-books will be shared with the students prior to the beginning of the programme to train them about each clinical subject. Students will have to take up an MCQ based test to clear the foundation module.

2

Didactic Module:

A series of pre-clinical exercises, practiced on simulation phantom head units of endodontics and prosthodontics, are scheduled which will help the student gain the skills and confidence to treat patients effectively.

FELLOWSHIPS FOR A BREAKTHROUGH CAREER

BATCH 2018 -19

Classroom & Distance Education

ABOUT IDA

The Indian Dental Association conducts Fellowship programmes for dental interns, post-graduates and dental clinicians of all ages, to pursue parallel careers in the upcoming and allied fields of dentistry. From the enthusiastic feedback of over 100 graduates, and the current buzz in the industry, we are confident of becoming the dentist's choice for continuing education. Our programmes provide a platform for our participants to network with experts and peers with similar professional interests. The opportunity for learning through IDA's Fellowship Programmes is for the eager and ambitious, for those who believe in thinking out of the box and break boundaries, for those who appreciate and recognize excellence, within and for themselves.
