Dear Sir/Madam,

Greetings from the Indian Society for Dental Research (ISDR/IADR-Indian Division), an affiliate of International Association for Dental Research, USA.

We hope you, your family, and your friends continue to remain safe from the ongoing viral spread. The world has been living with this virus for more than a year. In spite of the same, COVID-19 continues to disrupt our lives everywhere in the world.

Within the dental fraternity, different guidelines corresponding to the severity of the outbreak in various countries have been implemented, but uncertainties remain regarding the safety and efficacy of these new measures. There remains a lack of a standardized approach to continue dental procedures in this challenging environment, but appropriate infection control is key.

I am part of a team that is conducting an online global survey on dentists' knowledge and attitudes towards infection control in a post-pandemic situation. The link has been created using Duke NUS Qualtrics software. Hence the survey can be disseminated via email as well as social media. Participants are requested to submit the survey only once. The responses will be automatically recorded in our Duke NUS server. Please see the link to the survey below.

[https://nus.sydl.qualtrics.com/jfe/form/SV\\_4NMK94C7Ak6HWtg](https://nus.sydl.qualtrics.com/jfe/form/SV_4NMK94C7Ak6HWtg)

This is open to all dentists. I like to kindly request you to participate in this survey as well as pass on this valuable, policymaking survey to all your students, colleagues, and dental friends.

Thanking you in advance

Looking forward to hearing from you

With best regards  
Dr. S.M. Balaji

*Mr. Pathan to forward email to all teaching faculty &  
PG students.*
